

UB Transfer Matrix

Team Melo

SPP5: Low-Fi Prototyping

Problem/Solution Overview

Many users faced challenges when using the University of Belize's existing transfer matrix. Its inefficiency and poor navigation cause confusion and delays for students trying to transfer credits from other institutions. Melo aims to address all these issues by recreating the transfer matrix to be more streamlined and user-friendly. This will help students navigate the transfer process more effectively, make informed academic decisions, and reduce the workload for university staff, ultimately improving the overall process.

Mission Statement

Melo is dedicated to improving the usability and accessibility of the University of Belize's transfer matrix, ensuring that students can efficiently navigate and manage their course transfers with ease and confidence.

Value Proposition

Melo provides a simplified and intuitive interface for displaying transfer data at the University of Belize, helping students easily interpret and compare their course options for a smoother academic planning experience.

SELECTED DESIGN FEATURES

| | |
|---|---|
| Specific Search | Users can search for specific courses or institutions |
| Search by Filters | Users can narrow down their search by selecting from dropdown menus such as feeder school and major, or by typing and selecting options from these dropdowns. |
| Email/Message Registrar for Help | Users can quickly compose and send inquiries or requests for assistance to the registrar. |
| Print Results | Users can print or save their results as a PDF for future reference or sharing. |

- More Intuitive & Efficient For User Interaction
- Clean User Interface

[illegible]

The diagram illustrates a search process for a transferable course. At the top, a header bar contains the text "Transfer Hall" and a close button "X". Below this, a search bar is labeled "Search" and contains the text "Search course, major etc". To the right of the search bar is a magnifying glass icon. Below the search bar, there are two dropdown menus: "Feeder" and "Major". Below these dropdowns are two arrows pointing downwards. In the center of the diagram is a dashed square box with a magnifying glass icon inside it. Below this box, the text "Search for transferable course" is written. To the right of this text, the text "Feeder by sending an email" is written. Below this text, the text "COURSE name, course code, feeder" is written. To the right of this text, there is a box labeled "Seek assistance from" with a magnifying glass icon. Below this box, there are four input fields: "Name", "Email", "Phone", and "Address". Below the "Address" field is a "Submit" button.

EXPERIMENTAL METHOD

The participants for this experiment were selected at random at the University of Belize, Belmopan campus.

Participant #1

UB Student

Participant #2

UB Student

Participant #3

UB Student

Participant #4

UB Student

EXPERIMENTAL METHOD

The prototype testing was conducted at multiple locations on the Belmopan campus to provide a diverse and realistic environment for participants.

The participants were tested based on these tasks:

- Perform a specific search
- Perform a filter search
- Request for assistance by Email/Message
- Print results/findings

EXPERIMENTAL Results(Timing)

| TASKS | Participant #1 | Participant #2 | Participant #3 | Participant #4 |
|---------------------------------|-------------------|-------------------|-------------------|-------------------|
| Specific Search | 00:10 | 00:25 | 00:15 | 00:08 |
| Search by filters | 00:30 | 00:35 | 00:37 | 00:26 |
| Email/Message for assistance | 00:12 | 00:10 | 00:08 | 00:07 |
| Print results | 00:30 | 00:12 | 00:13 | 00:14 |

Experimental results

- All four participants completed the tasks successfully
- When shown the previous transfer matrix, they were eager to test the updated matrix
- “It would be nice if you could customize the report” = Participant 2
- “The filter’s are great but maybe they could be integrated into the general search” - participant 3
- “It looks and navigates so much nicer than the previous matrix” - participant 4
- “The print feature is a bit confusing” - participant 1
- Most participants were able to navigate through the prototype with ease.
- Participant 1 had issues locating the and using the print feature, however it may due to external factors

Suggested UI changes

Having some tooltips around the UI and buttons would increase usability and learnability

Improvements

Search

Course, School, etc.

Feeder Major Year...

Search for transferable courses using course name, feeder school, or course code.

Search

Course, School, etc.

Feeder Major Year...

Search for transferable courses using course name, feeder school, or course code.

When hovered there will be provided information of what the fields are.

Improvements

[illegible]

When hovered there will be provided information of what the fields are.

Summary

- Most participants were able to navigate through the prototype's features with ease
- Only 1 participant had trouble using a feature, but it was likely due to our group testing for the first time
- When shown the previous transfer matrix, all participants mentioned that the new UI looks much better than the previous ones
- They also mentioned that a more indepth search, and real-time table updates were a much better way than switching between pages, improving efficiency
- Overall the pilot testing was a success which also gave us valuable feedback for improving our user interface.
